Fannie Mae Reports Net Income of \$11.0 Billion and Comprehensive Income of \$10.6 Billion for 2015

Company Reports Net Income of \$2.5 Billion and Comprehensive Income of \$2.3 Billion for Fourth Quarter 2015

- Fannie Mae paid a total of \$10.3 billion in dividends to Treasury in 2015. The company expects to pay Treasury \$2.9 billion in dividends in March 2016. With the expected March 2016 dividend payment, Fannie Mae will have paid a total of \$147.6 billion in dividends to Treasury. Dividend payments do not reduce prior Treasury draws, which total \$116.1 billion.
- Fannie Mae provided approximately \$516 billion in liquidity to the mortgage market in 2015, including approximately \$116 billion in liquidity in the fourth quarter of 2015, enabling families to buy, refinance, or rent homes.
- Fannie Mae helped distressed families retain their homes or avoid foreclosure through approximately 122,000 workout solutions in 2015, including approximately 25,000 loan workouts during the fourth quarter of 2015.
- Fannie Mae continued to increase the role of private capital in the mortgage market and reduce taxpayer risk through its Connecticut Avenue SecuritiesTM (CAS), Credit Insurance Risk TransferTM (CIRTTM), and other types of risk sharing transactions. Through 2015, Fannie Mae had transferred a significant portion of the mortgage credit risk on over \$500 billion in unpaid principal balance of mortgage loans pursuant to these transactions.

WASHINGTON, DC — Fannie Mae (FNMA/OTC) reported annual net income of \$11.0 billion and annual comprehensive income of \$10.6 billion in 2015. For the fourth quarter of 2015, Fannie Mae reported net income of \$2.5 billion and comprehensive income of \$2.3 billion. The company reported a positive net worth of \$4.1 billion as of December 31, 2015, resulting in a dividend obligation to Treasury of \$2.9 billion, which the company expects to pay in March 2016.

"Our strong 2015 results demonstrate our commitment to improving both our company and the broader housing finance system," said Timothy J. Mayopoulos, president and chief executive officer. "We are listening closely to our customers so we deliver industry-leading solutions that make doing business with us easier, more efficient, and more certain. We are evolving our business model so we better serve the industry and taxpayers, and fulfill our essential role in making affordable mortgage and rental options available for millions of people across the country."

Full Year 2015 Results - Fannie Mae's 2015 net income of \$11.0 billion declined from \$14.2 billion in 2014. The decrease in 2015 net income was due primarily to:

- A substantial reduction in income resulting from settlement agreements resolving certain lawsuits relating to private-label mortgage-related securities sold to Fannie Mae
- Decreases in mortgage interest rates had a significant positive impact on the company's benefit for credit losses in 2014, while changes in interest rates were not a primary driver of the company's 2015 benefit for credit losses
- Increased expenses relating to the company's single-family foreclosed properties
- The decrease in 2015 net income was partially offset by lower fair value losses for the year due to smaller decreases in longer-term interest rates negatively impacting the value of the company's risk management derivatives

Fourth Quarter 2015 Results - Fannie Mae's fourth quarter 2015 net income of \$2.5 billion increased from \$2.0 billion in the third quarter of 2015. The increase in fourth quarter 2015 net income was due primarily to:

- Fair value gains in the fourth quarter of 2015 due primarily to increases in longer-term interest rates positively impacting the value of the company's risk management derivatives, compared with fair value losses in the third quarter of 2015
- The increase in fourth quarter 2015 net income was partially offset by a provision for credit losses due primarily to an increase in mortgage interest rates, a slight decline in home prices, and the redesignation of certain nonperforming loans from held-for-investment to held-for-sale, compared with a benefit for credit losses in the third quarter of 2015

SUMMARY OF FOURTH QUARTER AND FULL YEAR 2015 RESULTS

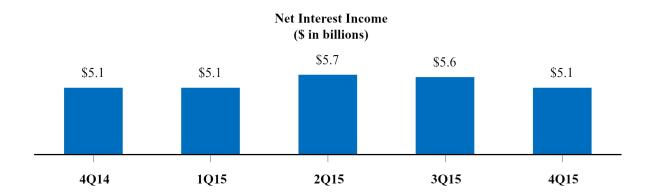

Summary of Financial Results

Dividends distributed or available for distribution to senior preferred stockholder	\$	(2,859)	\$	(2,202)	\$	(657)	\$	(11,216)	\$	(15,323)	\$	4,107

Net revenues, which consist of net interest income and fee and other income, were \$5.3 billion for the fourth quarter of 2015, compared with \$5.8 billion for the third quarter of 2015. For the year, net revenues were \$22.8 billion, compared with \$25.9 billion in 2014. The decline in net revenues in 2015 was driven by a decline in fee and other income, partially offset by an increase in net interest income.

Net interest income, which includes guaranty fee revenue, was \$5.1 billion for the fourth quarter of 2015, compared with \$5.6 billion for the third quarter of 2015. For the year, net interest income was \$21.4 billion for 2015, compared with \$20.0 billion for 2014. The increase in net interest income in 2015 compared with 2014 was due primarily to an increase in loan prepayment activity in 2015 as a result of a lower interest rate environment in the first half of the year.

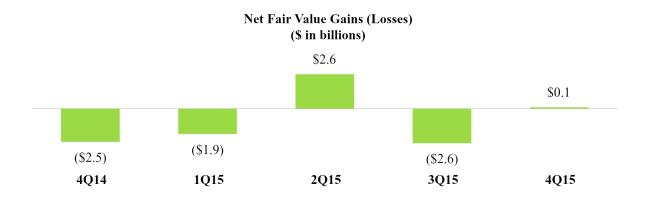

An increasing portion of Fannie Mae's net interest income in recent years has been derived from guaranty fees rather than from interest income earned on the company's retained mortgage portfolio assets. This is a result of both the impact of guaranty fee increases implemented in 2012 and the reduction of the retained mortgage portfolio. In 2015, approximately two-thirds of the company's net interest income was derived from its guaranty business. The company expects that guaranty fees will continue to account for an increasing portion of its net interest income.

Fee and other income was \$225 million for the fourth quarter of 2015, compared with \$259 million for the third quarter of 2015. For the year, fee and other income was \$1.3 billion for 2015, compared with \$5.9 billion for 2014. Fee and other income decreased in 2015 compared with 2014 due primarily to higher revenue recognized in 2014 as a result of settlement agreements resolving certain lawsuits relating to private-label mortgage-related securities sold to Fannie Mae.

Net fair value gains were \$135 million in the fourth quarter of 2015, compared with losses of \$2.6 billion in the third quarter of 2015. Net fair value gains in the fourth quarter of 2015 were due primarily to increases in longer-term interest rates positively impacting the value of the company's risk management derivatives. For the year, net fair value losses were \$1.8 billion, compared with losses of \$4.8 billion in 2014. The company recorded net fair value losses for the year due primarily to declines in longer-term interest rates negatively impacting the value of the company's risk management derivatives. The estimated fair value of the company's derivatives and securities may fluctuate substantially from period to period because of changes in interest rates, the yield curve, mortgage and credit spreads, implied volatility, and activity related to these financial instruments.

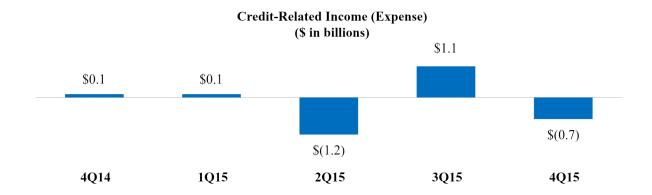

Credit-related expense, which consists of a provision or benefit for credit losses and foreclosed property expense or income, was \$732 million in the fourth quarter of 2015, compared with credit-related income of \$1.1 billion in the third quarter of 2015. Credit-related expense in the fourth quarter was due primarily to a provision for credit losses driven by an increase in mortgage interest rates, a slight decline in home prices, and the redesignation of certain nonperforming loans from held-for-investment to held-for-sale in connection with the company's plans to sell these loans, which resulted in the company adjusting these loans to the lower of their cost or fair value.

For the year, credit-related expense was \$834 million, compared with credit-related income of \$3.8 billion in 2014. This shift was driven primarily by a lower benefit for credit losses and higher foreclosed property expense in 2015. The reduction in the company's benefit for credit losses in 2015 as compared with 2014 was driven primarily by decreases in mortgage interest rates in 2014, which decreased the impairment on the company's individually impaired loans related to concessions provided on its modified loans and resulted in an increase in the benefit for credit losses in 2014. Changes in interest rates were not a primary driver of our 2015 benefit for credit losses. In addition, although home prices increased in both 2014 and 2015, home price increases had a smaller impact on the benefit for credit losses in 2015 compared with 2014, due primarily to the smaller number of nonperforming loans held for investment in the company's guaranty book of business in 2015 as compared with 2014. Also contributing to the lower benefit for credit losses in 2015 was the company's redesignation of certain nonperforming single-family loans from held-for-investment to held-for-sale in connection with its plans to sell these loans.

Foreclosed property expense increased in 2015 compared with 2014 due primarily to higher operating expenses relating to property tax and insurance costs on the company's single-family foreclosed properties and a decrease in the amount of income from the resolution of compensatory fees and representation and warranty matters.

VARIABILITY OF FINANCIAL RESULTS

Fannie Mae expects to remain profitable on an annual basis for the foreseeable future; however, certain factors, such as changes in interest rates or home prices, could result in significant volatility in our financial results from quarter to quarter and year to year. Fannie Mae's future financial results also will be affected by a number of other factors, including: the company's guaranty fee rates; the volume of single-family mortgage originations in the future; the size, composition, and quality of its retained mortgage portfolio and guaranty book of business; and economic and housing market conditions. The company's expectations for its future financial results do not take into account the impact on its business of potential future legislative or regulatory changes, which could have a material impact on the company's financial results, particularly the enactment of housing finance reform legislation. For additional information on factors that affect the company's financial results, please refer to "Executive Summary" in the company's annual report on Form 10-K for the year ended December 31, 2015 (the "2015 Form 10-K").

SUMMARY OF FOURTH QUARTER AND FULL YEAR 2015 BUSINESS SEGMENT RESULTS

The business groups running Fannie Mae's three reporting segments – its Single-Family business, its Multifamily business, and its Capital Markets group – engage in complementary business activities in

pursuing Fannie Mae's vision to be America's most valued housing partner and to provide liquidity, access to credit and affordability in all U.S. housing markets at all times, while effectively managing and reducing risk to Fannie Mae's business, taxpayers, and the housing finance system. In support of this vision, Fannie Mae is focused on: advancing a sustainable and reliable business model that reduces risk to the housing finance system and taxpayers; providing reliable, large-scale access to affordable mortgage credit for qualified borrowers and helping struggling homeowners; and serving customer needs and improving the company's business efficiency.

Single-Family Business

- Single-Family net income was \$936 million in the fourth quarter of 2015, compared with \$2.0 billion in the third quarter of 2015. The decrease in net income in the fourth quarter compared to the third quarter was driven by a shift to credit-related expense in the fourth quarter from credit-related income in the third quarter. For the year, the Single-Family business had net income of \$5.1 billion, compared with \$8.5 billion in 2014. The decrease in annual net income was driven by a shift to credit-related expense in 2015 from credit-related income in 2014.
- Single-Family guaranty fee income was \$12.5 billion in 2015, compared with \$11.7 billion in 2014. Single-Family guaranty fee income increased in 2015 compared with 2014 as loans with higher guaranty fees became a larger part of the company's Single-Family guaranty book of

- business in 2015 due to the cumulative impact of guaranty fee price increases implemented in 2012. The Single-Family guaranty book of business was \$2.83 trillion as of December 31, 2015 and \$2.85 trillion as of December 31, 2014.
- Single-Family credit-related expense was \$819 million in the fourth quarter of 2015, compared with credit-related income of \$1.0 billion in the third quarter of 2015. Credit-related expense in the fourth quarter was due primarily to a provision for credit losses. For the year, Single-Family credit-related expense was \$1.0 billion, compared with credit-related income of \$3.6 billion in 2014. The shift to credit-related expense in 2015 was driven by a lower benefit for credit losses and higher foreclosed property expense.

Multifamily Business

- Multifamily net income was \$334 million in the fourth quarter of 2015, compared with \$324 million in the third quarter of 2015. The increase in net income in the fourth quarter compared to the third quarter was driven primarily by an increase in credit-related income. For the year, Multifamily net income was \$1.5 billion for both 2015 and 2014.
- Multifamily guaranty fee income was \$375 million for the fourth quarter of 2015, compared with \$367 million for the third quarter of 2015. For the year, Multifamily guaranty fee income was \$1.4 billion in 2015 compared with \$1.3 billion in 2014. Multifamily guaranty fee income increased in 2015 compared with 2014 as loans with higher guaranty fees have become a larger part of the company's Multifamily guaranty book of business, while loans with lower guaranty fees continue to liquidate. The Multifamily guaranty book of business was \$213.4 billion as of December 31, 2015 compared with \$203.3 billion as of December 31, 2014.
- Multifamily credit-related income was \$87 million for the fourth quarter of 2015, compared with \$24 million for the third quarter of 2015. The increase in credit-related income in the fourth quarter compared to the third quarter was driven primarily by larger gains on the sale of REO properties. For the year, Multifamily credit-related income was \$201 million compared with \$197 million in 2014. Credit-related income remained relatively consistent in 2015 compared with 2014 as both years were driven by gains on the disposition of REO properties and improvements in the allowance for loan losses as a result of continued stability of multifamily market fundamentals.

Capital Markets

- Capital Markets net income was \$1.3 billion in the fourth quarter of 2015, compared with a net loss of \$23 million in the third quarter of 2015. The shift to net income in the fourth quarter was driven primarily by fair value gains on the company's risk management derivatives, compared with fair value losses in the prior quarter, partially offset by decreases in net investment gains and net interest income. The group had net income of \$5.5 billion for the year, compared with \$8.1 billion for 2014. The decline in annual net income in 2015 was due primarily to a shift to other expense from other income and decreases in net interest income and net investment gains, partially offset by lower fair value losses.
- Capital Markets other expense was \$444 million for the fourth quarter of 2015, compared with other expense of \$322 million for the third quarter of 2015. For the year, Capital Markets other expense was \$1.3 billion compared with other income of \$3.3 billion in 2014. The shift to other expense in 2015 from other income in 2014 was due primarily to higher revenue recognized in 2014 as a result of settlement agreements resolving certain lawsuits relating to private-label mortgage-related securities sold to Fannie Mae.

- Capital Markets net interest income was \$1.3 billion for the fourth quarter of 2015, compared with \$1.4 billion for the third quarter of 2015. For the year, Capital Markets net interest income was \$5.8 billion compared with \$7.2 billion in 2014. The decrease in annual net interest income in 2015 was due primarily to a decline in the average balance of the company's retained mortgage portfolio as the company continued to reduce this portfolio pursuant to the requirements of its senior preferred stock purchase agreement with Treasury and the Federal Housing Finance Agency's ("FHFA") additional portfolio cap.
- Capital Markets net investment gains were \$860 million in the fourth quarter of 2015, compared with \$1.6 billion in the third quarter of 2015. For the year, Capital Markets net investment gains were \$5.5 billion compared with \$6.4 billion in 2014. Investment gains decreased in 2015 compared with 2014 due primarily to lower gains on the sale of Fannie Mae MBS designated as available-for-sale securities as a result of an increase in interest rates in 2015.
- Capital Markets net fair value gains were \$63 million in the fourth quarter of 2015, compared with net fair value losses of \$2.7 billion in the third quarter of 2015. Net fair value gains in the fourth quarter of 2015 were due primarily to increases in longer-term interest rates positively impacting the value of the company's risk management derivatives. For the year, Capital Markets net fair value losses were \$2.0 billion compared with fair value losses of \$5.5 billion in 2014. The group recorded net fair value losses for the year due primarily to declines in longer-term interest rates negatively impacting the value of the company's risk management derivatives.
- Capital Markets retained mortgage portfolio balance decreased to \$345.1 billion as of December 31, 2015, compared with \$413.3 billion as of December 31, 2014, resulting from purchases of \$252.2 billion and liquidations and sales of \$320.4 billion during the year.

BUILDING A SUSTAINABLE HOUSING FINANCE SYSTEM

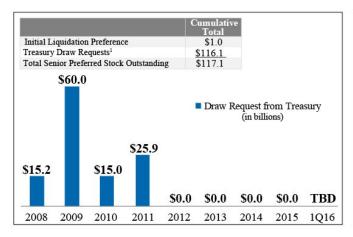

In addition to continuing to provide liquidity and support to the mortgage market, Fannie Mae has invested significant resources toward helping to maintain a safer and sustainable housing finance system for today and build a safer and sustainable housing finance system for the future. The company is pursuing the strategic goals identified by its conservator, the Federal Housing Finance Agency ("FHFA"). These strategic goals are: maintain, in a safe and sound manner, credit availability and foreclosure prevention activities for new and refinanced mortgages to foster liquid, efficient, competitive, and resilient national housing finance markets; reduce taxpayer risk through increasing the role of private capital in the mortgage market; and build a new single-family infrastructure for use by Fannie Mae and Freddie Mac and adaptable for use by other participants in the secondary market in the future.

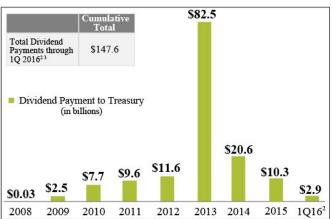

ABOUT FANNIE MAE'S CONSERVATORSHIP

Fannie Mae has operated under the conservatorship of FHFA since September 6, 2008. Fannie Mae has not received funds from Treasury since the first quarter of 2012. The funding the company has received under its senior preferred stock purchase agreement with Treasury has provided the company with the capital and liquidity needed to fulfill its mission of providing liquidity and support to the nation's housing finance markets and to avoid a trigger of mandatory receivership under the Federal Housing Finance Regulatory Reform Act of 2008. For periods through December 31, 2015, Fannie Mae has requested cumulative draws totaling \$116.1 billion and paid \$144.8 billion in dividends to Treasury. Under the senior preferred stock purchase agreement, the payment of dividends does not offset prior draws. As a result, Treasury maintains a liquidation preference of \$117.1 billion on the company's senior preferred stock.

Treasury Draws and Dividend Payments

- Treasury draw requests are shown in the period for which requested and do not include the initial \$1.0 billion liquidation preference of Fannie Mae's senior preferred stock, for which Fannie Mae did not receive any cash proceeds. The payment of dividends does not offset prior Treasury draws.
- Fannie Mae expects to pay a dividend for the first quarter of 2016 calculated based on the company's net worth of \$4.1 billion as of December 31, 2015 less a capital reserve amount of \$1.2 billion.
- (3) Amounts may not sum due to rounding.

In August 2012, the terms governing the company's dividend obligations on the senior preferred stock were amended. The amended senior preferred stock purchase agreement does not allow the company to build a capital reserve. Beginning in 2013, the required senior preferred stock dividends each quarter equal the amount, if any, by which the company's net worth as of the end of the immediately preceding fiscal quarter exceeds an applicable capital reserve amount. The capital reserve amount is \$1.2 billion for each quarter of 2016 and will be reduced by \$600 million each year until it reaches zero in 2018.

The amount of remaining funding available to Fannie Mae under the senior preferred stock purchase agreement with Treasury is currently \$117.6 billion. If the company were to draw additional funds from Treasury under the agreement in a future period, the amount of remaining funding under the agreement would be reduced by the amount of the company's draw. Dividend payments Fannie Mae makes to Treasury do not restore or increase the amount of funding available to the company under the agreement.

Fannie Mae is not permitted to redeem the senior preferred stock prior to the termination of Treasury's funding commitment under the senior preferred stock purchase agreement. The limited circumstances under which Treasury's funding commitment will terminate are described in "Business—Conservatorship and Treasury Agreements" in the company's 2015 Form 10-K.

CREDIT RISK TRANSFER TRANSACTIONS

In late 2013, Fannie Mae began entering into credit risk transfer transactions with the goal of transferring, to the extent economically sensible, a portion of the existing mortgage credit risk on some of the recently acquired loans in its single-family book of business in order to reduce the economic risk to the company and taxpayers of future borrower defaults. Fannie Mae's primary method of achieving this goal has been through the issuance of its Connecticut Avenue SecuritiesTM (CAS) and its Credit Insurance Risk TransferTM (CIRTTM) transactions.

These transactions transfer a portion of the mortgage credit risk associated with losses on specified reference pools of single-family mortgage loans to investors in CAS or to panels of reinsurers or insurers

FannieMae

in CIRT transactions. As of December 31, 2015, the company had completed a total of nine CAS transactions since the CAS program began in 2013 and seven CIRT transactions since the CIRT program began in 2014. Approximately 15 percent of the loans in the company's single-family conventional guaranty book of business as of December 31, 2015, measured by unpaid principal balance, were included in a reference pool for a CAS or CIRT transaction. The company also has executed other types of risk sharing transactions in addition to its CAS and CIRT transactions, including structures that transfer first loss risk. In the aggregate, Fannie Mae's credit risk transfer transactions completed through year end 2015 transferred a significant portion of the mortgage credit risk on single-family mortgages with an unpaid principal balance of over \$500 billion.

Fannie Mae has transferred a significant portion of the mortgage credit risk on over 95 percent of the single-family loans it acquired during the twelve months ended November 2014 in its targeted loan categories for its credit risk transfer transactions. Loan categories the company has targeted for credit risk transfer transactions generally consist of fixed-rate 30-year single-family conventional loans that meet certain credit performance characteristics, are non-Refi Plus, and have loan-to-value ratios between 60 percent and 97 percent. Based on their characteristics at the time the company acquired them, over 50 percent of the single-family loans the company acquired during the twelve months ended November 2014 were included in loan categories the company has targeted for credit risk transfer transactions. The portion of the company's single-family loan acquisitions it includes in credit risk transfer transactions can vary from period to period based on market conditions and other factors.

These transactions increase the role of private capital in the mortgage market and reduce the risk to Fannie Mae's business, taxpayers, and the housing finance system. The company intends to continue to engage in credit risk transfer transactions on an ongoing basis, subject to market conditions. Over time, the company expects that a larger portion of its single-family conventional guaranty book of business will be covered by credit risk transfer transactions.

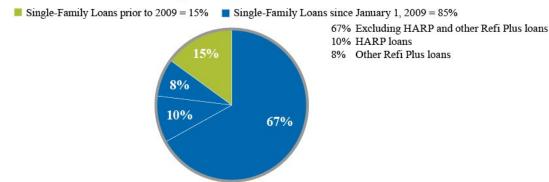

CREDIT QUALITY

While continuing to make it possible for families to buy, refinance, or rent homes, Fannie Mae has maintained responsible credit standards. Since 2009, Fannie Mae has seen the effect of the actions it took, beginning in 2008, to significantly strengthen its underwriting and eligibility standards to promote sustainable homeownership and stability in the housing market. Fannie Mae actively monitors the credit risk profile and credit performance of the company's single-family loan acquisitions, in conjunction with housing market and economic conditions, to determine if its pricing, eligibility, and underwriting criteria accurately reflects the risks associated with loans the company acquires or guarantees. Single-family conventional loans acquired by Fannie Mae in 2015 had a weighted average borrower FICO credit score at origination of 748 and a weighted average original loan-to-value ratio of 75 percent.

Fannie Mae's single-family conventional guaranty book of business as of December 31, 2015 consisted of single-family loans acquired prior to 2009; non-Refi PlusTM loans acquired beginning in 2009; loans acquired through the Administration's Home Affordable Refinance Program[®] ("HARP[®]"); and other loans acquired pursuant to the company's Refi Plus initiative, excluding HARP loans. The company's Refi Plus initiative, which started in April 2009 and includes HARP, provides expanded refinance opportunities for eligible Fannie Mae borrowers, and may involve the refinance of existing Fannie Mae loans with high loan-to-value ratios, including loans with loan-to-value ratios in excess of 100 percent.

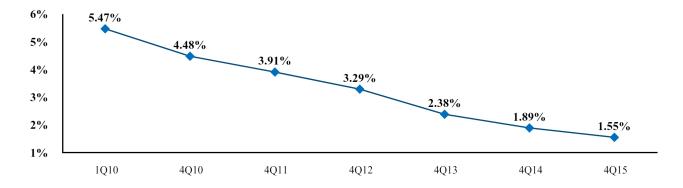

The single-family serious delinquency rate for Fannie Mae's book of business has declined for 23 consecutive quarters since the first quarter of 2010, and was 1.55 percent as of December 31, 2015, compared with 5.47 percent as of March 31, 2010. This decrease is primarily the result of home retention solutions, foreclosure alternatives and completed foreclosures, improved loan payment performance, and the company's acquisition of loans with stronger credit profiles since the beginning of 2009. The company's single-family serious delinquency rate and the period of time that loans remain seriously delinquent continue to be negatively impacted by the length of time required to complete a foreclosure in some states. Longer foreclosure timelines result in these loans remaining in the company's book of business for a longer time, which has caused the company's serious delinquency rate to decrease more slowly in the last few years than it would have if the pace of foreclosures had been faster. The slow pace of foreclosures in certain areas of the country has negatively affected the company's single-family serious delinquency rates, foreclosure timelines, and financial results, and may continue to do so. Other factors such as the pace of loan modifications, the timing and volume of future nonperforming loan sales the company makes, servicer performance, changes in home prices, unemployment levels, and other macroeconomic conditions also influence serious delinquency rates.

Single-Family Serious Delinquency Rate

Total Loss Reserves, which reflect the company's estimate of the probable losses the company has incurred in its guaranty book of business, including concessions it granted borrowers upon modification of their loans, decreased to \$28.8 billion as of December 31, 2015 from \$38.2 billion as of December 31, 2014. The decrease in the company's total loss reserves during 2015 was primarily driven by the company's approach to adopting the charge-off provisions of FHFA's Advisory Bulletin AB 2012-12; the

TannieMae

change in the company's accounting policy related to the treatment of accrued interest receivable; improvement in home prices; liquidations of mortgage loans; and the company's redesignation of certain nonperforming single-family loans from held-for-investment to held-for-sale, which relieved the allowance on these loans. The company's loss reserves have declined substantially from their peak and are expected to decline further.

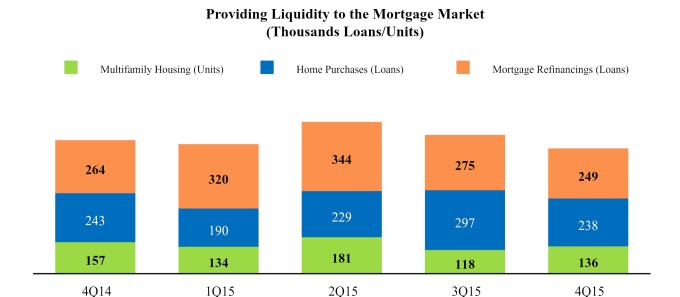

PROVIDING LIQUIDITY AND SUPPORT TO THE MARKET

Liquidity

Fannie Mae provided approximately \$516 billion in liquidity to the mortgage market in 2015, including approximately \$116 billion in liquidity in the fourth quarter of 2015, through its purchases and guarantees of loans, which resulted in:

- 954,000 home purchases in 2015, including approximately 238,000 in the fourth quarter of 2015
- 1,188,000 mortgage refinancings in 2015, including approximately 249,000 in the fourth quarter of 2015
- 569,000 units of multifamily housing in 2015, including approximately 136,000 in the fourth quarter of 2015

The company was one of the largest single issuers of single-family mortgage-related securities in the secondary market in the fourth quarter and full year of 2015, with an estimated market share of new single-family mortgage-related securities issuances of 36 percent in the fourth quarter and 37 percent for all of 2015, compared with 40 percent for all of 2014. The company's market share for single-family mortgage-related securities issuances decreased in 2015 compared with 2014 primarily as a result of competition from Ginnie Mae.

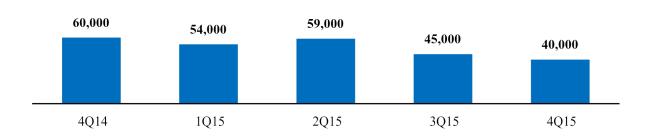

Fannie Mae also remained a continuous source of liquidity in the multifamily market in 2015. As of September 30, 2015 (the latest date for which information is available), the company owned or guaranteed approximately 19 percent of the outstanding debt on multifamily properties.

Refinancing Initiatives

Through the company's Refi Plus initiative, which offers refinancing flexibility to eligible Fannie Mae borrowers and includes HARP, the company acquired approximately 40,000 loans in the fourth quarter of 2015 and approximately 198,000 loans for the full year of 2015. Refinancings delivered to Fannie Mae through Refi Plus in the fourth quarter of 2015 reduced borrowers' monthly mortgage payments by an average of \$191. The company expects the volume of refinancings under HARP to continue to decline, due to a decrease in the population of borrowers with loans that have high LTV ratios who are willing to refinance and would benefit from refinancing.

Home Retention Solutions and Foreclosure Alternatives

To reduce the credit losses Fannie Mae ultimately incurs on its book of business, the company has been focusing its efforts on several strategies, including reducing defaults by offering home retention solutions, such as loan modifications.

Single-Family Loan Workouts											
	For the Year Ended December 31,										
	20	15	20	14	2013						
	Unpaid Principal Balance	Number of Loans	Unpaid Principal Balance	Number of Loans	Unpaid Principal Balance	Number of Loans					
			(Dollars in	millions)							
Home retention solutions:											
Modifications	\$ 15,723	94,212	\$ 20,686	122,823	\$ 28,801	160,007					
Repayment plans and forbearances completed	835	5,996	986	7,309	1,594	12,022					
Total home retention solutions	16,558	100,208	21,672	130,132	30,395	172,029					
Foreclosure alternatives:											
Short sales	3,033	14,716	4,795	23,188	9,786	46,570					
Deeds-in-lieu of foreclosure	1,145	7,361	1,786	11,292	2,504	15,379					
Total foreclosure alternatives	4,178	22,077	6,581	34,480	12,290	61,949					
Total loan workouts	\$ 20,736	122,285	\$ 28,253	164,612	\$ 42,685	233,978					
Loan workouts as a percentage of single-family guaranty book of business	0.73%	0.71%	0.99%	0.94%	1.48%	1.33%					

Fannie Mae views foreclosure as a last resort. For homeowners and communities in need, the company offers alternatives to foreclosure. In dealing with homeowners in distress, the company first seeks home retention solutions, which enable borrowers to stay in their homes, before turning to foreclosure alternatives.

- Fannie Mae provided approximately 25,000 loan workouts during the fourth quarter of 2015 and approximately 122,000 for the full year of 2015 enabling borrowers to avoid foreclosure.
- Fannie Mae completed approximately 19,000 loan modifications during the fourth quarter of 2015 and approximately 94,000 for the full year of 2015.

FORECLOSURES AND REO

When there is no viable home retention solution or foreclosure alternative that can be applied, the company seeks to move to foreclosure expeditiously in an effort to minimize prolonged delinquencies that can hurt local home values and destabilize communities.

Single-Family Foreclosed Properties

For the	ber 31,	
2015	2014	2013
87,063	103,229	105,666
78,636	116,637	144,384
(108,446)	(132,803)	(146,821)
57,253	87,063	103,229
\$ 6,608	\$ 9,745	\$ 10,334
0.45 %	6 0.67 %	0.82 %
	87,063 78,636 (108,446) 57,253 \$ 6,608	87,063 103,229 78,636 116,637 (108,446) (132,803) 57,253 87,063 \$ 6,608 \$ 9,745

- Fannie Mae acquired 16,750 single-family REO properties, primarily through foreclosure, in the fourth quarter of 2015, compared with 17,725 in the third quarter of 2015.
- As of December 31, 2015, the company's inventory of single-family REO properties was 57,253, compared with 60,958 as of September 30, 2015. The carrying value of the company's single-family REO was \$6.6 billion as of December 31, 2015.
- The company's single-family foreclosure rate was 0.45 percent for the full year of 2015. This reflects the total number of single-family properties acquired through foreclosure or deeds-in-lieu of foreclosure as a percentage of the total number of loans in Fannie Mae's single-family guaranty book of business.

Fannie Mae's financial statements for the full year of 2015 are available in the accompanying Annex; however, investors and interested parties should read the company's 2015 Form 10-K, which was filed today with the Securities and Exchange Commission and is available on Fannie Mae's website, www.fanniemae.com. The company provides further discussion of its financial results and condition, credit performance, and other matters in its 2015 Form 10-K. Additional information about the company's credit performance, the characteristics of its guaranty book of business, its foreclosure-prevention efforts, and other measures is contained in the "2015 Credit Supplement" at www.fanniemae.com.

###

In this release, the company has presented a number of estimates, forecasts, expectations, and other forward-looking statements, including statements regarding: its future dividend payments to Treasury; the impact of and future plans with respect to the company's credit risk transfer transactions; the sources of its future net interest income; the company's future profitability; the factors that will affect the company's future single-family serious delinquency rates; the future volume of its HARP refinancings; the future fair value of the company's financial instruments; the company's future loss reserves; and the impact of the company's actions to reduce credit losses. These estimates, forecasts, expectations, and statements are forward-looking statements based on the company's current assumptions regarding numerous factors, including future interest rates and home prices, the future performance of its loans and the future guaranty fee rates applicable to the loans the company acquires. Actual results, and future projections, could be materially different from what is set forth in the forward-looking statements as a result of: home price changes; interest rate changes; unemployment rates; other macroeconomic and housing market variables; the company's future serious delinquency rates; the company's future guaranty fee pricing and the impact of that pricing on the company's guaranty fee revenues and competitive environment; government policy; credit availability; changes in borrower behavior, including increases in the number of underwater borrowers who strategically

default on their mortgage loans; the volume of loans it modifies; the effectiveness of its loss mitigation strategies; significant changes in modification and foreclosure activity; the volume and pace of future nonperforming loan sales and their impact on the company's results and serious delinquency rates; the effectiveness of its management of its real estate owned inventory and pursuit of contractual remedies; changes in the fair value of its assets and liabilities; future legislative or regulatory requirements or changes that have a significant impact on the company's business, such as the enactment of housing finance reform legislation; future updates to the company's models relating to loss reserves, including the assumptions used by these models; changes in generally accepted accounting principles; changes to the company's accounting policies; whether the company's counterparties meet their obligations in full; effects from activities the company takes to support the mortgage market and help borrowers; the company's future objectives and activities in support of those objectives, including actions the company may take to reach additional underserved creditworthy borrowers; actions the company may be required to take by FHFA, in its role as its conservator or as its regulator, such as changes in the type of business the company does, a requirement that the company implement a principal forgiveness program or the implementation of a single GSE security; limitations on our business imposed by FHFA, in its role as the company's conservator or as its regulator; the conservatorship and its effect on the company's business; the investment by Treasury and its effect on the company's business; the uncertainty of the company's future; challenges the company faces in retaining and hiring qualified employees; the deteriorated credit performance of many loans in the company's guaranty book of business; a decrease in the company's credit ratings; defaults by one or more institutional counterparties; resolution or settlement agreements the company may enter into with its counterparties; operational control weaknesses; changes in the fiscal and monetary policies of the Federal Reserve, including any change in the Federal Reserve's policy toward the reinvestment of principal payments of mortgage-backed securities or any future sales of such securities; changes in the structure and regulation of the financial services industry; the company's ability to access the debt markets; disruptions in the housing, credit, and stock markets; government investigations and litigation; the company's reliance on and the performance of the company's servicers; conditions in the foreclosure environment; global political risks; natural disasters, environmental disasters, terrorist attacks, pandemics, or other major disruptive events; information security breaches; and many other factors, including those discussed in the "Risk Factors" section of and elsewhere in the company's annual report on Form 10-K for the year ended December 31. 2015. and elsewhere in this release.
